GENERAL INDEX

A

Absorption in *Trianea*, 105
Accessories, for dissecting microscope, 430
Acidity, soil, H. KAPPEN, 190
Address list, international, 290, 623
Advances in plant physiology, recent, E. C. BARTON-WRIGHT, 291
Aeration, relation to root development of hydrophytes, 69
Alcohol, evaporation from plant extracts, useful device, 617
Alcohols, toxicity, 131
Alfalfa, measurements of hardiness, 215
Aliphatic alcohols, toxicity, 131
Alpine plants, rock garden and, HENRI CORREVON, 442
American lotus, dormancy and growth, 225
Analyses, ash, 194
Analysis, methods, 97
Analytical methods, committee, 289
Anatomical structure of roots, influence of leafage removal, 543
ANDREWS, F. M,. HUGO DE VRIES, 175
Annual election, 437
  meeting, Des Moines, 185
  seventh, 621
Antagonism in *Trianea*, 105
  calcium and iron, 112
  ion, 472
Apparatus, for absorption of CO_2, 26
  for determination of dissolved CO_2, 537
  for dissecting and microchemical manipulation, 430
  for evaporation of alcohol from plant extracts, 617
  for hydrogen ion determinations, 251
  for inducing mitogenetic ray effects, 121
Apple twigs, determination of dissolved CO_2 in sap, 538
  respiration and hardiness, 509
Apples, seedless, second crop, 273
Arsenical sprays, toxic action on *Convolvulus*, 331
Ash, of soybean shoots, 142
Ash constituents of pasture grasses, 193
ASKENASY demonstration, 419
Asparagin, in buffer mixtures, 309
Aspergillus, thermogenic activity, 568
Autoclaving, effect on sucrose percentage in sugar beets, 350
Awards, life memberships, 185
  STEPHEN HALES prize, 186

B

BACKER, C. A., Problem of Krakatoa, 190
Back numbers, PLANT PHYSIOLOGY, wanted, 190
Bacteria, physiology and biochemistry of, R. E. BUCHANAN and E. I. FULMER, 442, 625
Bananas, protopectin, 94
BARKLEY, GRACE, obit., 439
Barley kernels, growth curves, 263
BARNES, CHARLES REID, life membership fund, 186
  life membership awards, 185
  Plant physiology, revised by C. A. SHULL, 625
BARRON, D. H., Effect of molds on temperature of stored grain, 565
BARTON-WRIGHT, E. C., Recent advances in plant physiology, 291
BEAUMONT, J. H., Respiration of apple twigs and winter hardiness, 509
Beets, sugar, determination of sucrose, 345
BENOY, MARJORIE P., Respiration rate and composition of fresh vegetables, 181
Bindweed, physiology of, in relation to control by chemical sprays, 329
Biochemistry of bacteria, physiology and, R. E. BUCHANAN and E. I. FULMER, 442, 625
BORODIN, D. H., Energy emanation (M-rays) in cell division, 119
Boron, essential nature to growth and fruiting of tomato, 387

Botanical congress, fifth international, 621
travel to, 188
Botanical institute, laboratory at University of Zagreb, 183
Brauner, L., Laboratory manual of plant physiology, 291
Brieger, Friederich, Self sterility and hybrid sterility, 626
Bromus hordeaceus, influence of leafage removal on root anatomy, 543
Brown, William R., Carbon dioxide dissolved in sap and respiration measurements, 535
Brunstetter, B. C., Microelectrode for hydrogen ion concentrations, 249
Bryophyllum leaves, correlation potentials in, 491
Buchanan, R. E., Physiology and biochemistry of bacteria, 442, 625
Buffer mixtures, reproducing titration curves of wheat seedlings, 307
Bush, M,. Electric correlation potentials in *Bryophyllum* leaves, 491

C

Calcium and iron antagonism, 112
requirements of plants, 468
Callusing, of cotton stem cuttings, 575
Carbohydrate-nitrogen relation of soybean, effect of fertility, 607
Carbon black, as decolorizing agent, 361
dioxide, in plant sap, 535
Celebration, at Rutgers University, 624
Cell division, energy emanation during, 119
Cells and tissues, hydrogen ion concentration in, James Small, 291
Changes, chemical, in peas after picking, 399
Chemical changes, in peas after picking, 399
composition, of fresh vegetables, influence of respiration rate, 181
of tomato with yellows, 157
sprays, control of *Convolvulus*, 329
Chemistry of protoplasm, Alexander Kiesel, 626
Chicago, University of, new laboratory, 440
Chlorophyll content of leaves, effect of methods of storage, 599
Chlorophyllase, as factor in loss of chlorophyll during storage, 604
Clarification, of plant juice, study, 359
reagents, 364
Clark, Norman Ashwell, Rôle of manganese, in nutrition of *Lemna*, 241
Classification, of "tomato pockets," 235
Clements, F. E., Plant ecology, 191
Plant competition, 192
Collards, Georgia, root elongation affected by sodium luminal, 587
Committee, analytical methods, 289
life membership, 437
physical methods, 437
program, Cleveland meeting, 289
Competition, plant, F. E. Clements, J. E. Weaver, and Herbert C. Hanson, 192
Composition of corn stems, 556
of peas after picking, 399
effect of freezing on, 411
of tomato with yellows, 157
of vegetables, and respiration rate, 181
Concentration, hydrogen ion, in plant cells and tissues, James Small, 291
Conductivity measurements, 219
Congress, botanical, fifth international, 621
travel to, 188
Pacific science, fourth, 167
Congresses, international, 290
Conrad, C. M., Furfural-yielding substance from protopectin, 93
Constituents, ash, of, pasture grasses, 193
Content, chlorophyll, of leaves, effect of methods of storage, 599
Control of *Convolvulus arvensis*, chemical sprays, 329
Convolvulus arvensis, physiology, in relation to control by chemical sprays, 329
Cooper, H. P., Ash constituents of pasture grasses, significance of electrode potentials, 193
Corn, effect of somatic injury on yield, 430
Corn plants, accumulated iron in nodes, 393

Corn stem, maturing, distribution of moisture, dry matter, and sugar in, 555
Correlation potentials, electric, in *Bryophyllum*, 491
CORREVON, HENRI, Rock garden and alpine plants, 442
Cotton stem cuttings, callusing, 575
CRAFTS, A. S., Physiology of *Convolvulus arvensis*, control by chemical sprays, 329
Accessories for dissecting microscope, 430
Critical tables, international, 191
Curves, growth, of barley kernels, 263
Cuttings of cotton stems, callusing, 575
permanganate treatment, 582
Cyclosis, of protoplasm, 108

D

Death of members, 438
Demonstration, ASKENASY, 419
Desiccation, effect on chlorophyll content of leaves, 602
Determination, of hydrogen ions, microelectrode for, 249
of nitrate nitrogen in plant juice, 359
of phosphate in plant tissues, 413
of sucrose in sugar beets, 345
Development of roots, hydrophytes, 69
Device, for evaporating alcohol, 617
Dewberries, protopectin, 95
DEXTER, S. T., Measuring hardiness of plants, 215
Dissecting microscope, accessories, 430
Distribution law, GIBBS-DONNAN, 473
of moisture, dry matter, and sugar, in maturing corn stem, 555
Dormancy of American lotus, 225
Dry matter, distribution in maturing corn stem, 555

E

Ecological significance, of electrode potentials of ash constituents, 193
Ecology, plant, J. E. WEAVER, and F. E. CLEMENTS, 191
Effect of fertility on carbohydrate-nitrogen relation of soybean, 607
of molds on temperature of stored grains, 565
of storage methods on chlorophyll content of leaves, 599
EISENMENGER, WALTER S., Toxicity of aliphatic alcohols, 131
Election, annual, 437
Electric correlation potentials, *Bryophyllum*, 491
Electrode, micro, for hydrogen ion concentration determinations, 249
potentials, of ash constituents, 193
Elongation of roots, affected by sodium luminal, 587
Emanation of energy (M-rays) in cell division, 119
EMMERT, E. M., Rapid determination of phosphate in fresh tissues, 413
Endowment fund, 187
Energy emanations (M-rays) in cell division, 119
relations of leaves, mass factor, 279
Errata, 624
Estimation of nitrate nitrogen in plant juice, 359
Etiolation, wheat, titration curves of seedlings, 307
Evaporation of alcohol, useful device, 617
Exploring for plants, DAVID FAIRCHILD, 441
Expression of plant juice, study, 359
Extent of root system and feeding power, 470
Extraction methods for plastid pigments of tobacco, 257
Extracts, plant, device for evaporating alcohol from, 617
Exudation, root, chemical nature, 445

F

Factor, mass, in energy relations of leaves, 279
FAIRCHILD, DAVID, Exploring for plants, 441
Feeding power, of plants, 443
value, and mineral content, 201
Fertility, effect on carbohydrate-nitrogen relation of soybean, 607
Fertilizers, effect on watermelon quality, 373
Fifth international botanical congress, 621

FISHER, PAUL L., Essential nature of boron to growth and fruiting of tomato, 387
FISHER, R. A., Statistical methods for research workers, 440
Flower seed, wild, 290
FLY, CLAUDE L., Rôle of manganese in nutrition of *Lemna*, 241
Fourth Pacific science congress, 167
FREAR, DONALD E., Estimation of nitrate nitrogen in plant juice, 359
Freezing, effect on composition of peas, 411
Fruiting of tomato, essential nature of boron to, 387
FULMER, E. I., Physiology and biochemistry of bacteria, 442, 625
Fund, general endowment, 188
life membership, 186
STEPHEN HALES prize, 187, 290
Furfural-yielding substance, from protopectin, 93

G

Garden plants, rock and alpine, HENRI CORREVON, 442
GARDNER, F. E., Useful device for evaporating alcohol from plant extracts, 617
General physiology, G. W. SCARTH and F. E. LLOYD, 440
Georgia collards, root elongation affected by sodium luminal, 587
Germination of grain, production of temperature, 567
of wheat in relation to temperature and oxygen pressure, 1
GIBBS-DONNAN distribution law, 473
GILMAN, JOSEPH C., Effect of molds on temperature of stored grain, 565
GRABER, L. F., Measuring hardiness of plants, alfalfa, 215
Gradient, hydrogen ion concentration, 461
Grain, stored, effect of molds on temperature, 565
Grasses, pasture, ash constituents, 193
Growth, of American lotus, 225
of tomato, essential nature of boron to, 387
of wheat, relation of temperature and oxygen pressure to, 1
Growth criteria, 133
Growth curves, barley kernels, 263

H

HALES, STEPHEN, prize award, 186
prize fund, 187, 290
HANSON, HERBERT C., Plant competition, 192
Hardiness, preliminary results of measuring, 215
values, BEAUMONT and HILDRETH'S scale for apples, 523
winter, relation of respiration in apple twigs, 523
HARLAN, H. V., Growth curves, barley kernels, 263
